## STORAGE

As limited on-site storage facilities for packing materials and boxes are available, it is recommended that exhibitors keep packing materials to a minimum. Exhibitors may not leave boxes and packing materials in the Exhibition Display Area during the event.

# STAND CONSTRUCTION & EXHIBITS

## CABLES

Electrical or other cables crossing walkways or public areas at floor level could cause a trip hazard. Where possible cables should be raised above the walkway. If this is not possible, cables need to be covered with carpet tile, matting or taped with gaffer tape or cable covers.

In high traffic areas changes in floor level should be highlighted with high visibility or yellow/black hazard tape.

## DEMONSTRATION OF EQUIPMENT

Where an event or exhibition has demonstrations using portable electrical equipment, the Safety Manager must give special approval. Also, extra safety precautions must be taken to protect members of the public. These extra precautions must be complied with at all times or the demonstration will be stopped. A current permit to demonstrate must be held.

## ELECTRICAL EQUIPMENT

The BCEC Management reserves the right to request removal from the site of any electrical equipment it deems to be non-compliant or suspect and can call upon internal specialists to assist when necessary.

All portable electrical equipment, appliances and leads used on the BCEC site must be tested and tagged in accordance with Australian Standard 3760 and WH&S Act 2011. Any electrical equipment found not tested will have to be tested immediately or removed from the Centre. For safety reasons, double adaptors are not to be used in the Centre.

Where an Exhibition has demonstrations using portable electrical equipment, a work permit needs to be submitted to the BCEC Safety Department.

Any person who suffers an electric shock from any piece of electrical equipment MUST report the incident IMMEDIATELY to the Centre's Security Department by dialing (8) on a wall phone.

## FLOOR LOAD WEIGHT LIMITS

All floor areas within the BCEC have specified loading limits per square meter. Any equipment or item to be displayed, or used during an event weighing more than 500 kilograms must be assessed prior to the item or equipment being positioned. A current permit must be held for items over 500 kilograms, and BCEC requires the following information in advance of the commencement of the build:

- The dimensions of the base of the item;
- The gross weight of the item;
- A picture or diagram of the item; and
- An indication on the floor plan where the item is to be located.

## LPG GAS - USE ON STANDS

The use of LPG on stands in the Exhibition Halls may be permitted if a current BCEC Naked Flames and Liquid Petroleum Gas permit is held, and all relevant statutory and regulatory requirements are met.

Permit forms can be downloaded [here](#).

Once completed, please send to [exhibitorservices@bcec.com.au](mailto:exhibitorservices@bcec.com.au) for approval.

## MOTOR VEHICLE DISPLAYS

All vehicles must be supplied with a drip-tray. The vehicle keys are to be left with Security Control, unless alternate arrangements have been made with the Event Planning Manager.

All vehicles displayed on a gradient (e.g. one set of wheels on a ramp) are to be locked and no access to be granted unless removing the vehicle from the display. If the display has the vehicle totally off the floor level, chains or straps for added safety must also secure the vehicle.

A Vehicle Display permit is required to display vehicles at BCEC.

## TEMPORARY STRUCTURES

All temporary structures will be professionally designed, structurally sound and will contain reasonable provision for:

- Safety of persons to be accommodated in the event of fire, including means of egress.
- Prevention of fire.
- Suppression of fire.
- Health of persons accommodated.
- All structures over 2.4 meters in height, where persons either staff or guests gather, must be certified by an engineer.
- Patrons must give consideration for wheelchair access to the Stand (Building Code of Australia – Section D3.3).

The reduction of the existing level of fire protection is not permissible. Designers and builders have an obligation to design and construct to these principles and any relevant standards or legislation while meeting the special needs of their client.

Stands over 18sqm where roofing is fitted must have a “Smoke Detection Device” and have a fire extinguisher installed. The recommended material for the roofing is “shark tooth” type material that allows water penetration from sprinklers and fire canon.

## CUSTOM STANDS

All custom stands must be approved by the Brisbane Convention & Exhibition Centre safety department. Please ensure that you discuss this with your custom stand builders if applicable. All custom stands plans are to be sent to [exhibitorservices@bcec.com.au](mailto:exhibitorservices@bcec.com.au) for approval at least 14 days prior to the event bump in. The stand design must include the stand name, number and all measurements so the safety team can assess accordingly.
